

Regeneration *Drosophila melanogaster*
Non parametric regression

04/07/2016

Outline

Non parametric regression

Filter: upregulation 0h after heatshock VS 0h after cell death

Gene classes

ATACSeq

Aggregation plots

Heatmaps

Peaks

Non parametric regression - 1716 protein-coding genes

p-value < 0.5 and statistical value > 0

Non parametric regression - 78 non-coding genes

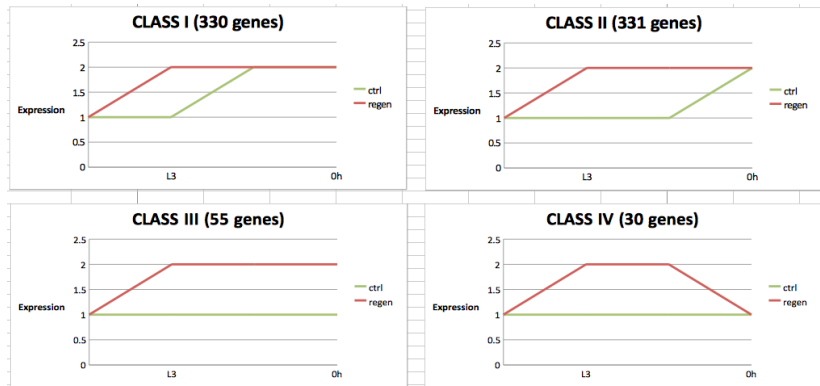

NPReg, upregulation 0h - 830 protein-coding genes

NPReg, upregulation 0h - 19 non-coding genes

NPReg, upregulation 0h - 830 protein-coding genes

NPReg, upregulation 0h - 19 non-coding genes

NPReg, upregulation 0h - class1

NPReg, upregulation 0h - class2

NPReg, upregulation 0h - class3

NPReg, upregulation 0h - class4

NPReg, upregulation 0h - class5

NPReg, upregulation 0h - class6

NPReg, upregulation 0h - class7

NPReg, upregulation 0h

class1

class3

class2

class4

NPReg, upregulation 0h

class5

class6

class7

NPReg, upregulation 0h - class1

NPReg, upregulation 0h - class2

NPReg, upregulation 0h - class3

NPReg, upregulation 0h - class4

NPReg, upregulation 0h - class5

FBgn0013683 mt:ND4L mitochondrial NADH-ubiquinone oxidoreductase chain 4L

NPReg, upregulation 0h - class5

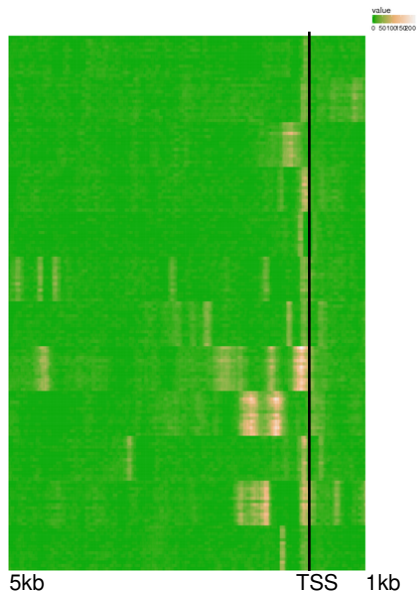

without FBgn0013683 mt:ND4L mitochondrial NADH-ubiquinone oxidoreductase chain 4L

NPReg, upregulation 0h - class6

NPReg, upregulation 0h - class7

Peaks found after cell death but not after heashock in 5kb TSS

iCis target

We have a test version up and running from today:

<http://gbiomed.kuleuven.be/apps/lcb/i-cisTarget-mcv7/>

We still need to test it ourself, but you can already try.

There are no guarantees that this URL will stay available and/or will be working all the time and will give correct results.

Cheers,
Gert

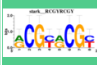

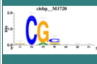

iCis target - class1 0h
